

SignGuy AI — Build Log

January 27 → February 15, 2026 · high-level daily summary

Mon, Jan 27, 2026

Project kickoff

- SignGuy AI repository created — initial empty commit.
- Decision: full-stack SaaS for sign/graphics shops (CRM, quotes, invoicing, jobs, payroll, webstores, AI tools).

Tue, Jan 28, 2026

Application scaffold + first admin pages

- FastAPI backend + React (CRA) + Shadcn UI baseline wired up.
- First admin pages stood up: Dashboard, Customers, Quotes, Invoices, Jobs, Productivity, Financials, Payroll, TimeClock, Webstores, AI Tools.
- Top-level MainLayout (sidebar + topbar) shipped.

Wed–Thu, Jan 29–30, 2026

Polish + iteration on day-1 pages

- No new top-level pages — UI/UX iteration only.

Sat, Jan 31, 2026

Invoice preview

- Invoice Preview Modal added so invoices can be reviewed before send/download.

Sun, Feb 1, 2026

Theme toggle

- Light/Dark theme toggle component added.

Mon, Feb 2, 2026

Product catalog

- Products page added (catalog of items used by quotes/invoices/webstores).

Tue–Wed, Feb 3–4, 2026

Iteration

- Stability + visual polish; no new modules.

Thu, Feb 5, 2026

Public Storefront

- Public-facing Storefront page launched — customers can browse a tenant's webstore without logging in.

Fri, Feb 6, 2026

Iteration

- Refinements to storefront + admin pages.

Sat, Feb 7, 2026

Auth + Customer Portal v1

- Real Login page shipped.
- Customer Portal v1 launched (customers can see their own data).
- User Management admin page added.

Sun–Mon, Feb 8–9, 2026

Iteration

- Auth/portal polish, no new modules.

Tue, Feb 10, 2026

Pricing engine + full Customer Portal

- Pricing Calculator + Pricing Settings + Pricing landing page shipped.
- Company Settings page added (logo, branding, tax, payroll, etc.).
- Webstore Detail Dashboard added for admins to manage stores.
- Customer Portal expanded to a full suite: Portal Dashboard, Portal Login, Portal Messages, Portal Orders, Portal Pages, Portal Profile, Portal Proofs.

Wed, Feb 11, 2026

Iteration

- Stabilization + bug-fixing across the pricing + portal work; no new modules.

Thu, Feb 12, 2026

Major refactor + AI Assistant phases 2/3/4 + Webstore Owner Stripe Connect

- Backend modularized — server.py split into models/, routes/, services/ packages (auth, customers, jobs, invoices, quotes, employees, pricing, portal, webstores).
- Questionnaire 'Send via Email' endpoint + branded HTML email shipped. Fixed Public Questionnaire dark-bg contrast.
- New 'Events' webstore product category added (alongside business/fundraiser/creator).
- Platform fee schedule corrected: \$5 invoice now charges the right 31¢ instead of undercharging 11¢. Webstore checkout includes the +2% webstore surcharge.
- Founders-only feature flag — all paid features unlocked for founder tenants while in launch phase.
- Webstore Owner Stripe Connect (Phase A/B/C): owner invite (quick + full portal), Stripe Express onboarding, activation gate (store can't go live until owner's Stripe is connected), auto-transfer of owner commission on order completion.
- Webstore Owner Portal launched: owners see their stores, sales, transfer history, and a Stripe Express dashboard link.
- AI Assistant Pass 2 — proactive Dashboard 'Nudges' widget (stale quotes, overdue invoices, upcoming appointments), inline Draft Email modal with GPT-4o-mini, SendGrid send, rolling long-term memory.

- AI Assistant Pass 3 — real tool calling: `navigate()`, `create_task()`, `create_appointment()`, `query_shop_metric()`. Asking 'how much did I make today' or 'open the schedule' now triggers a real action instead of a chat reply.
- AI Assistant Pass 4 — `set_reminder` + `send_quote_followup_bulk` tools. Tool-calling system extracted into its own module so new tools are 1-line adds.
- AI Assistant 'kill generic mode' + Personality picker (Ops Partner / Wise Mentor / Cheerful Helper / No-BS Direct) + quick-action intent pills.
- Pricing Foundation 'Show Math (Behind the Scenes)' debug panel — see exactly how each price was calculated, with a Raw JSON copy.

Fri, Feb 13, 2026

Billing + Tier system

- Multi-tier subscription system shipped: Starter / Pro / Business / Founders Edition.
- Pricing Page (public) launched.
- Billing Success / Billing Cancel return pages for Stripe Checkout.
- Trial Lockout + Upgrade Modal so over-quota features prompt an upgrade instead of failing silently.
- Backend `tier_config` + `feature_gate` services — single source of truth for what each plan can do.

Sat, Feb 14, 2026

Iteration

- Billing flow stabilization. No new modules.

Sun, Feb 15, 2026

Top-5 Pre-launch Platform Gaps — ALL CLOSED

- #1 Admin Audit Log — every privileged Platform Admin action (impersonation, suspend, etc.) is now captured with actor, target, IP, and metadata. New `/platform-admin/audit-log` page.
- #2 Suspend / Reactivate Tenant — instant kill switch with reason, self-lockout protection, structured 403 response on suspended logins, and an `/account-suspended` page. Optional 'Welcome back' email on reactivation.
- #3 Failed-Payment / Dunning Workflow — auto-suspend after 3 consecutive Stripe failures, auto-reactivate on success, Founder 24h grace period, per-tenant threshold override, manual 'Mark as Paid' for NET-60 customers. Every transition writes a billing audit row.
- #4 Email Deliverability Dashboard — SendGrid Event Webhook live; every email's `delivery_status` (delivered / deferred / bounce / dropped / spam) is now visible to Platform Admin with full event timeline per message.
- #5 System-wide Announcement Banner + Maintenance Mode — Platform Admin can broadcast a banner (info/warning/critical, optional auto-expire) and toggle maintenance mode, which blocks all non-admin writes with a structured 503 while keeping reads open.
- Result: pre-launch platform-readiness checklist is fully cleared.

Notes: Jan 27 – Feb 11 entries are reconstructed from git file-add history (commit messages were auto-generated UUIDs). Feb 12 + Feb 15 entries are drawn directly from the dated CHANGELOG / PRD entries. Tiny per-file changes intentionally omitted — only material features, modules, and platform milestones are listed.
